O B S E S S I O N

Those who possess a love for the water understand that pure tranquility exists in the stillness of the open sea. It lives in the whisper of a cool breeze. It harmonizes through the symphony of rolling waves. It conceals the mystery beyond endless horizons. Collectively, these exceptional moments inspire OCEAN ALEXANDER to meticulously craft bespoke yachts that grant you a magnificent seafaring experience in ultimate luxury. In all, offering uniquely personal moments you will cherish for the rest of your life.

Our design team understands your passion for the water, your reverence, your respect, and the fortitude of the sea. This innate passion drives us to constantly recreate our design queues and elevate them to a level of unmatched luxury and elegance. We imagine brilliant ways to utilize space, create innovative solutions for privacy, and provide functional living space utilization for the most discerning owners and their guests. Our commitment is to craft every OCEAN ALEXANDER yacht as an object of great beauty and an engineering marvel brought to life.

We are gripped with the idea that any object this wondrous and rare deserves to be constantly examined and refined. At OCEAN ALEXANDER we are proud to be a company made up of passionate people infused with tremendous talent. Our collective obsession to create perfection is brought on by the knowledge that every OCEAN ALEXANDER yacht is a dream made real.

GLOBAL RESPONSIBILITY.

OCEAN ALEXANDER takes pride in our dedication to tirelessly innovate methods to reduce waste and have made a conscientious commitment to the world around us. We actively engage in a variety of responsible practices that not only benefit our global environment, but we also believe it transcends to our workforce. Recycling has become paramount in our manufacturing process from our wood scraps and cabinetry by-products, to paper, metals, and even chemicals. Our factory is also fortunate to be in a zone of significant rainfall which allows for collected rainwater to be used in cleaning, landscaping, and service areas. These initiatives are not generally easy on our bottom line, but protecting the environment is a cause that reciprocates with peace of mind.

UNPARALLELED SUPPORT.

When you own an OCEAN ALEXANDER, you become a member of an exclusive suite of after-sales service, social events, and a concierge level of attention. With our annual Rendezvous and active owner network, we have created a world for our owners that does not end at the edge of the dock. This network of service continues to expand around the globe ensuring you will always have resources that allow you to travel free from worry.

COMMITMENT TO INDUSTRY.

Our commitment to the Marine Industry requires our team to look at the future, assess where comfort and functionality meet, and collectively bring it all together by collaborating with the finest naval and interior architects. Safety, efficiency, and sustainability drive every new venture and OCEAN ALEXANDER engineers have defined the top curve in yacht design. Our brand is often the inspiration for what you see in the yachts of tomorrow. We will continue to push innovation, discover more sophisticated manufacturing processes, and continue to re-define what true luxury can be.

32 LEGEND

OCEAN ALEXANDER pays homage to our 40+ year heritage with the all new 32 Legend. The 32L is 105 feet of stunning elegance. This latest vision is an artistic rendition that comes from a legacy of exquisite long range motor yachts.

The 32L provides sublime entertaining spaces that are not only luxurious, but practical. Contemplating beautiful horizons are accommodated by floor-to-ceiling glass panels, which bring in an abundance of natural light. The magnificent sky lounge creates another level of solitude for family and guests alike, with ample space and 360 degree views.

The on-deck master stateroom welcomes you to a private oasis, away from the engine noise and water movement as you move from port to port in overnight comfort. The lower deck welcomes guests in four en-suite staterooms that envelope your guests in privacy and stunning architectural elements enjoyed throughout the yacht.

This extraordinary vessel is designed for extended cruising across the globe.

The epitome of traveling in style and sophistication.

Salon

THE SALON AND DINING AREAS ARE EXPANSIVE AND IMPRESSIVE.

The salon gives spectacular views to port, aft and starboard with near full-length windows that offer horizon vistas, even while guests are seated on the deeply comfortable built-in settee. Inventive I-beam engineering makes these huge windows one more example of OCEAN ALEXANDER'S obsession with constant design refinement. Optional side doors allow for a refreshing cross-breeze and instantly brings you closer to your surroundings. To starboard, the length of the salon is a glossy expanse of exotic-wood cabinetry topped with natural stone. Storage options abound with two pullout drawers with custom-fitted stemware holders to preserve your crystal.

Dining Area

THE MAIN DECK MASTER BEDROOM IS A LIGHT-FILLED VISION.

The master bedroom is a luxurious private oasis on the main deck. This stateroom commands views so big they were once impossible to obtain, but our I-beam engineering has made them come to life with glorious, light-filled windows. How amazing, to awake to the sun rising over tropical islands and drift to sleep while looking out onto the vast stretches of sea around you.

Master Suite and Bath

VIP Cabin and Stateroom

Bridge Deck

A LUXURIOUS SPACE FOR ENTERTAINING.

This second salon is your destination when you climb the spiral staircase from the main-deck dining area. The 32L enclosed bridge is a luxurious entertaining spot where sunsets and sunrises can fill the huge windows on all four sides. We've built in a well-equipped wet bar, including a refrigerator, icemaker and storage for your serving pieces. A drop-down television and discreet day head are here as well. Aft doors glide open quietly when you want to step outside to feel the ocean breeze.

ALLEGIANCE TO INNOVATION

OCEAN ALEXANDER takes exceptional performance to be paramount in luxury yacht building. Our team of relentless engineers have found the formula for developing magnificent yachts to encompass luxury, beauty, and speed while maintaining sound levels that allow you to take in the joyful sounds of the open ocean. We engage the finest interior architects and the most respected naval architects, allowing this synergy to take your senses to a higher level. None of this is new to OCEAN ALEXANDER. As we embark on the future, we push one another harder to stretch the boundaries of innovation, while respecting the accomplishments of yesterday.

COMMITMENT TO SAFETY

Once your journey begins out in the open sea, OCEAN ALEXANDER has taken every engineering detail to the highest level to ensure safe passage in sometimes challenging ocean conditions. While each vessel is prepared for moderate to high sea state conditions, your comfort and safety is our highest priority. The air intake ventilation for the engine room is recessed into the house and not the hull side resulting in less possibility of water intrusion. When OCEAN ALEXANDER builds and sources our components we generally look to vessels that exceed and nearly double our size classification. To say we overbuild is an understatement.

DEDICATION TO FUNCTIONALITY

Technology has become paramount in simplifying our daily lives and your yacht should be no different. OCEAN ALEXANDER has engaged with the finest system integration brought on from the aerospace industry and utilize Octoplex to command your vessel. The Octoplex system is not only believed to be the most sophisticated in the yacht industry, it is standard on all OCEAN ALEXANDER yachts and has been for nearly 15 years. Sophisticated, approachable, and designed for ease-of-use, this system has everyone in mind, it is as stunning as it is functional, not just for your captain and crew, but for you and your guests as well.

OBSESSION TO DETAIL

As with any beautiful structure, the details lie deep within. Our engine rooms are modeled after clean rooms in data and medical environments. From plumbing to electrical, every detail is given the utmost scrutiny as to access, function, and beautiful design. When possible, we provide the simplest accessibility for items that require regular service and finish off the space with high gloss paints and vapor proof commercial lighting.

YOUR
DREAM.
